CERN/585/Draft

DRAFT RESOLUTION

The COUNCIL,

having at its Session examined document CERN/542 (Report on the Design Study of Intersecting Storage Rings (ISR) for the CERN Proton Synchrotron) and document CERN/586 (Procedure for the Establishment and Control of a Supplementary Programme for the Construction of Intersecting Storage Rings at Meyrin), and other relevant documents, and having taken into account the relevant Articles of the Convention;

being of the opinion that the project proposed in CERN/542 is a supplementary programme in accordance with the terms of that Convention;

considering that approval in principle by two-thirds of all Member States is required before any supplementary programme can be undertaken;

APPROVES in principle the undertaking, by the Member States who wish to participate, in accordance with the provisions of document CERN/586, of a supplementary programme to construct intersecting storage rings as described in document CERN/542,
