ORGANISATION EUROPÉENNE POUR LA RECHERCHE NUCLÉAIRE  
**CERN** EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH

---

COMMITTEE OF COUNCIL  
Fourteenth Meeting  
Geneva - 18 December, 1957.

DRAFT RESOLUTION

4211/e

DRAFT RESOLUTION

has taken note that, at various international conferences, communications from research centres outside Europe have revealed that studies were being made in these centres on new acceleration principles.

It considers that the study of the means that should be used to develop fundamental research after the completion of the Proton Synchrotron falls within the bounds of the task which it was given by the Member States, and that this constitutes the very type of service which it is in a position to provide Member States, with, since it has gathered unique teams of research workers and technicians in Europe, which no country would be able to form.

Consequently it gives the Director-General authority to have these new principles of acceleration studied with a view to determining future possibilities and eventually to submitting to the Member States the proposals that he might deem advisable. These studies would have to be financed within the budget limits laid down by the Council.
